FUMIGANTS

ALUMINUM PHOSPHIDE ........................................................................................................ 129
MAGNESIUM PHOSPHIDE ..................................................................................................... 131
METHYL BROMIDE .................................................................................................................. 132
PHOSPHINE ........................................................................................................................... 133

READ THE LABEL FOR CORRECT USAGE, FIRST AID AND PRECAUTIONARY STATEMENTS! STATE RESTRICTIONS MAY ALSO APPLY.
Common Name: ALUMINUM PHOSPHIDE
Prominent Trade Name(s): DETIA, FUMITOXIN, PHOSTOXIN, WEEVIL-CIDE
Chemical Name: Phosphinidynealuminum (or Aluminum Phoshide)

REGULATORY STATUS

Classified for Restricted Use due to high acute inhalation toxicity of phosphine gas
Signal Word: DANGER

COMMENTS

The registrant D&D Holdings, Inc. provided the following text:

For retail sale to dealers and certified applicators only. For use by certified applicators or persons under their direct supervision, and only for those uses covered by the certified applicator’s certification. Consult with your state lead pesticide regulatory agency to determine regulatory status, requirements, and restrictions for fumigation use in that state. A fumigation management plan must be written for all fumigations prior to actual treatment. Always read and follow the label.

These products are currently undergoing registration review by the U.S. EPA. Upon completion of this review, substantial changes could be applied.”

Common Name: METHYL BROMIDE

Prominent Trade Name(s): METH-O-GAS

Chemical Name: Bromomethane

REGULATORY STATUS

<table>
<thead>
<tr>
<th>Classified for Restricted Use due to acute toxicity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Signal Word: DANGER</td>
</tr>
</tbody>
</table>

COMMENTS

The EPA on 12/10/93 published a final rule that Methyl Bromide could not be produced in the U.S. or imported into the U.S. after January 1, 2001 due to its stratospheric ozone depletion potential. In October 1998, the Clean Air Act was amended to change the phase out date from January 1, 2001 to January 1, 2005. A Methyl Bromide production exemption has been in effect for quarantine and pre-shipment (QPS) uses since 2001 and will continue after 2005. Additional Methyl Bromide exemptions for critical uses will also be allowed in 2005 and subsequent years.

In addition to the Restricted Use statement above regarding acute toxicity, the label also includes “For retail sale to and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.”

The Meth-O-Gas® Q product’s label allows fumigation of popcorn at dosages to satisfy trade and quarantine requirements, but does require supervision of a federal or state official.

Meth-O-Gas® Q is not registered in Washington DC, Iowa, Kentucky, New Hampshire, North Dakota, Vermont, West Virginia, Nevada, Maine, and Wyoming.

Meth-O-Gas® 100 is registered in all states and Washington DC.

Common Name: PHOSPHINE
Prominent Trade Name(s): ECO₂ FUME; VAPORPH₃OS
Chemical Name: Phosphine

REGULATORY STATUS

| Classified for Restricted Use due to high acute inhalation toxicity of phosphine gas |
| Signal Word: DANGER |

COMMENTS

For retail sale to Dealers and Certified Applicators only. For use by Certified Applicators or persons under direct supervision of Certified Applicators. Only for those uses covered by the Certified Applicator's certification.

ECO₂FUME® was registered by the EPA for food use on August 28, 2000. A Cytec sponsored stewardship program is required to use ECO₂ FUME®. This is available free of charge.

VAPORPH₃OS® was regulated by the EPA for food use on May 17, 2002. A Cytec sponsored Stewardship program is required to use VAPORPH₃OS. This is available free of charge.
