The autumn season brings out witches, goblins and ghosts and one of the most favorite celebrations of the year: National Popcorn Poppin’ Month.

For the child in us all there’s also Halloween, but National Popcorn Poppin’ Month is a month-long celebration, which means plenty of time to enjoy America’s most popular “poppable” snack. Grab a handful and you’re helping consume some of the 16 billion quarts Americans eat each year. That’s roughly 51 quarts per man, woman and child.

Popcorn’s popularity is partially due to its irresistible aroma and taste, but it’s also a food that’s long been a part of American culture, associated with good times. Curious kids love watching the magical transformation from a hard seed to soft, fluffy snack while budget conscious parents love its “cheap eats” status. And everyone can appreciate that popcorn is a whole grain, providing carbohydrates and fiber to the diet, and naturally low in fat and calories.

With all those reasons to love popcorn (as if you really needed them) why not scare up this frightfully good treat, compliments of the Popcorn Board (www.popcorn.com).
